

**Lam Geotechnics Limited**

## **ENVIRONMENTAL POLICY STATEMENT**

Lam Geotechnics Limited values the sustainability of the natural and social environments. We shall contribute to this through their protection, maintenance and enhancement.

In order to meet our values and those of our clients and society, we shall integrate environmental management considerations into our geotechnical and environmental investigation, monitoring and testing operation as well as associated support.

In this respect, the minimization of pollution and natural resources depletion are our main considerations and shall be achieved through pursuance of the following objectives:

- Implementation, maintenance and continual development of an effective environmental management system conforming with ISO14001:2004;
- Provision of information through training, communication and promotion to ensure that our staff and supply chain possess the knowledge to contribute to environmental protection;
- Allocation of adequate resources throughout the business cycle to control and monitor significant environmental aspects;
- Promotion of teamwork and total involvement throughout the company and its supply chain in order to conform with environmental legislation and relevant contractual requirements;
- Monitoring and evaluation of corporate environmental performance through regular inspection, audit and review;
- Continuous improvement to our working methods and services in order to prevent environmental incidents and be an industry leader; and
- Zero prosecution and no. of non-conformance  $\leq 1$  per year.
